

KEYSERV GP

• ——— INTERVIEW RECORDING SYSTEM

The MaestroVision “Keyserv GP” provides law enforcement with the next generation recording capabilities in a cost effective package. Catering to the most discerning video experts in the Broadcast Industry, MaestroVision has leveraged its experience and expertise to bring law enforcement officials the very best in interrogation recording.

When combined with its Video Library and archiving System “Veotek GP”, a complete turn-key solution is finally available to record, catalogue, store, and retrieve all of the different media types collected.

- Records simultaneously up to 4 independent video/audio sources in HD.
- Embedded audio eliminates audio syncing issues.
- User generated electronic notes stored with each video clip.
- Simple and efficient content indexing.
- Intuitive user interface reduces operator learning curve.
- Long term archiving and data recovery.
- Output files for recording multiple copies on DVDs, Blu-ray and others.
- Outstanding video and audio quality from the video experts.
- User defined “Delete” date automatically eliminates files no longer required.
- System automatically generates a thumbnail timeline of recording at user defined intervals.
- Advanced security features protect content and rights management access.
- 24/7 technical support.

“The product proposed and implemented by MaestroVision exceeds our needs in terms of judicial interviews, and is very easy to use.”

*Inspector Luc Larocque, Criminal Investigations Division,
Thérèse-de-Blainville Municipal Police*
