PRESS RELEASE

February 4th 2015

Success story at the Thérèse-de-Blainville Municipal Police

Montreal, QC, February 4th, 2015- MaestroVision is pleased to announce the successful implementation of their police interview recording solution and library management system.

This MaestroVision technology was installed at the Thérèse-de-Blainville Municipal Police headquarters who were delighted with the result: *“The product proposed and implemented by MaestroVision exceeds our needs in terms of judicial interviews, and is very easy to use”* said Inspector Luc Larocque, Criminal Investigations Division.

The solution provided by MaestroVision not only offered an excellent quality product and a user-friendly interface, but also HD quality video, impeccable sound, as well as the option to record onto hard drive and extract files to DVD. The system is highly intuitive, and no training was required.

Their previous installed systems were beset with recurring problems. The quality of both audio and video was poor, and synchronization between the two was unstable and difficult to use. Training and specialized personnel were needed to manage the records.

“Promptly answering our clients' needs by offering innovative solutions incorporating the very best in video technology, is where MaestroVision excels.” said Claude Turcotte, President and CEO of MaestroVision.
